

KLAMATH TREE LEAGUE

"Promoting awareness and appreciation of trees in the urban environment."

The **Klamath Outstanding Trees Registry** project is an effort to identify particularly significant trees in Klamath Falls and nearby areas. Our goal is to locate Klamath's most unique and magnificent mature trees, and to record and protect their special importance for future generations.

The Klamath Tree League is seeking nominations for the Klamath Outstanding Trees Registry. A panel of local tree enthusiasts, foresters and arborists will evaluate nominations and compile the Registry, to be published and available to the public. The property owner of each selected tree will receive a Klamath Outstanding Tree Certificate.

Following are some guidelines to be considered for nominating a tree or group of trees:

Size and Location – Is the tree of remarkable size, or in a particularly important location?

Unusual Features – For example, is the tree of a species that is rarely seen in Klamath Falls or is it an exceptionally well-shaped and maintained mature tree?

Historical Significance – Was the tree planted by an historical figure, leading citizen or group?

Nomination for Klamath Outstanding Trees Registry

Tree Variety (common name) _____ (botanical name) _____
(If you are unable to identify the species of tree, please let us know () and we will make arrangements for the tree to be identified.)
